Summary

Versatile and detail-oriented **Software Engineer** with solid experience in **backend development, system architecture, and distributed computing**. Proficient in building **scalable, high-performance applications using Python and Django**, with a focus on clean code, SOLID principles, and dynamic business logic configurations. Skilled in designing and integrating **API-driven systems**, optimizing system performance, and managing distributed environments using **Celery, Docker, and parallel processing techniques**. Strong background in **automation, AI applications, DevOps practices, and agile development methodologies**. Adept at solving complex problems and collaborating across teams to deliver robust and flexible software solutions that align with business goals.

Education

NED University of Engineering and Technology, Karachi, Pakistan

Bachelor's degree, Computer and Information Systems Security/Information Assurance

Jan 2019 - May 2023

Kuwait Secondary School, Sana'a, Yemen

High School, Sciences Feb

2014 - Dec 2017

Al-Methaq School, Sana'a, Yemen

Matriculation , General Studies

Feb 2011 - Dec 2014

Experience

Software Engineer(Django Development)

FinTechSys for financial technology

March 2025 - (Present)

Working on large-scale, AI-driven KYC systems, integrating AI utilities via APIs hosted on distributed platforms. Focused on building a high-performance, scalable, and distributed architecture that supports dynamic business logic configurations through DMN (Decision Model and Notation) models within Django. Designed the system to allow flexible runtime feature toggling and business rule management, ensuring adaptability even in production environments. Emphasized performance optimization, efficient resource management in distributed environments, and strict adherence to SOLID principles. Implemented pluggable authentication strategies and comprehensive system logging to ensure complete traceability of transactions and system operations.

Programming and Systems Development Officer

النادي الترفيهي الرياضي **Club Sportainment**

March 2024 - March 2025

The Programming and Systems Development Department was established as recommended by us,

which serves the strategic plan of the Club by automating all customer experiences as well as internal processes of the club. Some of the projects we are working on are: Smart gate for the swimming pool, which opens only for those who have tickets. Online booking for the rooms in the club. Online follow-up platform for maintenance work and QA. Providing all the needed tech requirements for marketing, etc.

Django Developer

PeakByte

Jun 2022 - Present (2 year) Django Developer

Software Architect Trainee

ثروات

Nov 2023 - Jan 2024 (3 months)

The internship agenda encompassed a comprehensive array of topics, including Business Modeling, Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Clean Architecture, API Development, Unit Testing with xUnit, Agile and Scrum Methodologies, Azure DevOps Engineering, and Reusability in Software Development.

Django Developer trainee, Karachi, Pakistan

National Center in Big Data and Cloud Computing (NCBC)

Aug 2023 - Sep 2023 (2 months)

FYP project Lead , NED UET, Karachi, Pakistan

NCL - NED

Feb 2022 - Aug 2023 (1 year 7 months)

Energy Efficient AI Core on FPGA for Point of Care Application (Diabetic Ratinopathy)

Artificial Intelligence Trainee, Karachi, Pakistan

NCL - NED

Jan 2023 - Mar 2023 (3 months)

Co Director of HR team, NED UET, Karachi, Pakistan

Artificial Intelligence Club

Feb 2021 - Feb 2022 (1 year 1 month)

Customer Service Specialist, Karachi, Pakistan

Snoonu

Sep 2021 - Nov 2021 (3 months)

Director of Logistics

Artificial Intelligence Club

Feb 2020 - Feb 2021 (1 year 1 month)

Import Assistant

Abu Hames Motorcycles

Oct 2019 - Sep 2020 (1 year)

Member

Artificial Intelligence Club

Feb 2019 - Feb 2020 (1 year 1 month)

Salesperson

تجارية المترب Mutarreb Enterprises

Feb 2014 - Nov 2014 (10 months)

Licenses & Certifications

اليمن-للاتصالات العام المعهد International Computer Drivers License (ICDL,) - Frontend

Web Development- HTML - Great Learning

Frontend Web development - CSS - Great Learning

CSS and JavaScript Certification - Udemy 0004

Data Visualization - Kaggle

Introduction to Agile Development and Scrum - IBM

YFGVUZCRMKK2

Programming with JavaScript - Meta

LHX68QJXYA9C

Introduction to Databases - Meta

MX8J8VKQUHPM

Building Web Applications in Django - University of Michigan Z5USU8GTEBZY

Python(basics) - HackerRank

998F5D08C5B5

Problem Solving - HackerRank

32B2FBCBCD83

Introduction to Git and GitHub - Google E5H2RJSPDZJ9

Skills

Python – Django • Git • GitHub • Creative Problem Solving • Pynq-z1 • Computer Hardware • Modeling and Simulation • Database Development • SQL • Agile Development • Parallel programming • distributed computing • celery workers • docker • image processing
